

Q1 Name → Manish Singh
Class Roll No → 42
University Roll No → 2101106
Course → MCA 2
Section → B

Q2 → Explain the use of external CSS.

Ans: The external style sheet is generally used when we want to make change on multiple pages. It is ideal for this condition because it facilitates us to change the look of the entire web by changing just one file.

E.g.

```
<head>
<link rel="stylesheet" type="text/css" href="mystyle.css">
</head>
```

⇒ Example External CSS :-

```
<!DOCTYPE html>
<html>
<head>
  <link rel="stylesheet" href="styles.css">
</head>
<body>
  <h2> This is a heading </h2>
  <p> This is a paragraph </p>
</body>
</html>
```

styles.css

body { background-color: Red;

h2 { color: blue;

p { color: green;
